

Connect your business to drive productivity and profits

With Suite Engine **Rental Process Management**

What's driving a need for a new ERP system?

35% redundant data due to lack of ERP software, unaligned business systems (33%), and the inability to track processes in real time (28%) ([Panorama Consulting](#))

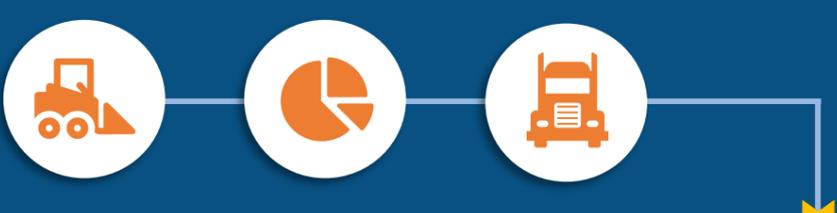

82% of small to midsize businesses fail because of poor cash flow management ([Entrepreneur](#))

\$200,000 on average is lost from businesses with fewer than 100 employees, making them most susceptible to fraud ([ACFE](#))

Current systems are disconnected and struggle to handle the complexity of a growing dealership

Run your dealership with a single solution that streamlines business processes and helps employees **work faster and smarter**

Deploy one solution to manage your financials, sales, rental, service, and operations

Connect apps like banking apps, CRM systems, eCommerce, or custom APIs

Create sales quotes, orders, and invoices right from Outlook and get tasks done on the go with mobile apps

Incomplete data and tedious reporting create blind spots and lead to poor decisions

Create a single source of truth by seamlessly **sharing data across every department in your dealership**

Centralize your data from sales, rental, service, accounting, purchasing, and parts for a 360° view of all your customers' interactions

Create customized reports and view compelling dashboards with Microsoft Power BI

Lack of controls, workflows, and unsecure data causes business risks

Trust in a solution that helps maintain compliance, secures data, and **delivers a 99.9% uptime service level agreement**

Handle, store, and transmit data securely across your systems.

Protect information from unauthorized access with automatic Microsoft datacenter encryption

Control access to personal data and implement audit trails to ensure security and accountability
