

# Suite Engine Channel Sales Manager Release Notes

**Product:** Channel Sales Manager for Magento

**Release:** 1.19

**Version:** 1.19.20211029.35508

**Release Date:** 10/29/2021

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements. separate

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at <https://suiteengine.com/support>.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see [here](#)) and make any adjustments to these packages as needed.

## Release Overview

### Features and Functionality

- Support for Microsoft Dynamics 365 Business Central 2021 Wave 2 (version 19) has been added to CSM for Magento.
- Magento-specific accommodations have been made to support recent changes to Suite Engine's subscription management module.

### Corrections

- Some fields on the CSM for Magento setup wizard were not visible. This has been corrected.
- Attempting to post a shipment with a blank tracking number, title, or carrier through CSM for Magento would result in an error. This has been corrected.
- Error message content was not being displayed on CSM API message records. This has been corrected.

## Miscellaneous

- The CSM for Magento default data load has been updated to store last run timestamps against CSM automation records instead of API records.

## Release Objects
