

Suite Engine Channel Payments Manager Release Notes

Product: Channel Payments Manager for Stripe

Release: 1.0

Version: 1.0.2021120919.37398

Release Date: 12/09/2021

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements.

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at <https://suiteengine.com/support>.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see [here](#)) and make any adjustments to these packages as needed.

Release Overview

A new integration between Business Central and the Stripe platform is available with CPM. This contains the setup and processing functionality that is standard to CPM integrations, including:

Setup

- Setup and configuration of payment platforms that specify how retrieved payments and payouts are processed in Business Central, including G/L account setup that controls how payment amounts are posted.
- Linking of Business Central customers to external payment platform records.
- Linking of Business Central items to external payment platform records.

Processing

- Sending of customer and invoice payment activity from Business Central to external payment platforms.
- Initiation of payment requests from Business Central.
- Retrieval of data from external payment platforms, including:
 - Subscription invoices.
 - Payment activities.
 - Bank payouts.

- The sending and retrieval of data can be automated through standard Business Central job queue functionality.

Please see the full [product documentation](#) for detailed information on the features and functionality of this integration.

Release Objects

The following objects have been created, modified, or removed as part of this release:

Object Type	Object ID	Object Name	Action
Page	70338725	SENPStripeCreditCardPayment	Created
Codeunit	70338725	SENP Stripe Request Processing	Created
Codeunit	70338726	SENP Stripe Secure HTTP Proc.	Created
Codeunit	70338727	SENP Stripe API DataLoad	Created
Codeunit	70338728	SENP Stripe Response Mgt	Created
Codeunit	70338729	SENP Stripe Utility Functions	Created
Codeunit	70338730	SENP Stripe Transaction Mgmt	Created
