

Suite Engine Channel Sales Manager Release Notes

Product: Channel Sales Manager for Magento

Release: 2.0

Version: 2.0.2022041320.44663

Release Date: 04/13/2022

Minimum Business Central Version Compatibility: 18.2

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements separate.

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at <https://suiteengine.com/support>.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release is compatible with the Business Central version listed above as the **Minimum Business Central Version Compatibility** and all subsequent Business Central versions; if you are deploying this release in a Business Central environment that has an earlier version than this value, functionality may not work as intended.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see [here](#)) and make any adjustments to these packages as needed.

Release Overview

Upgrade Instructions

This release introduces a new **Channel Shipping Method** field (field number 205) to the **CSM Order** table, which replaces the **Ship Service Level** field (field number 200). If you are upgrading your existing CSM integration with this release, you must make the following changes to ensure that your solution continues to operate as desired:

1. Update your existing API mapping. In the **CSM API Functions** page, select the API function code *SALESORDERLIST*. Choose the **API Mappings** button in the ribbon, and in the **CSM API Mappings** page, locate the existing mapping for table 70338221, field 200 and update this field number to 205.
2. Update any custom extensions that use the legacy **Ship Service Level** field to use the new **Channel Shipping Method** field.

Features and Functionality

- Magento-specific accommodations have been made to support the addition of a new **Channel Shipping Method** field has been added to the **CSM Shipping Method** and **CSM Order** tables and their related pages in CSM Core. This field replaces the existing **Ship Service Level** field, which is where an external platform’s retrieved shipment method code was stored. The existing field entered these retrieved values as Business Central codes, which resulted in a format that was incompatible with some platforms. The new field retrieves these values as text, which will support all data retrieval scenarios. See the [upgrade instructions](#) for more details.

Corrections

- When a CSM automation routine was interrupted or aborted, the **Last Run Timestamp** field was still being updated. This has been corrected.
- Ship-to and bill-to address information was not being captured on CSM orders. This has been corrected.

Miscellaneous

- CSM for Magento’s default demo data load has been updated to support new features introduced with this release.

Release Objects

The following objects have been created, modified, or removed as part of this release:

Object Type	Object ID	Object Name	Action
Page	70338301	CSM Magento Setup Wizard	Modified
Codeunit	51003	CSM Magento2 Test	Modified
Codeunit	70338301	CSM API Magento Processing	Modified
Codeunit	70338304	CSM Magento Data Load	Modified
Codeunit	70338305	CSM API Magento M2 Processing	Modified
