

# HomeBuilder Release Notes

**Product:** HomeBuilder

**Release:** 4.0

**Version:** 1.0.2022050619.46300

**Release Date:** 2022-05-06

Please review the [“HomeBuilder Release Notes Testing Advisory”](#) prior to installing on your system.

## Release Overview

Fix the behaviour of Dimensions on sales and purchase lines to allow for using these base documents to function without HomeBuilder tables being populated.

To report any issue or request an enhancement in HomeBuilder or Retainage please submit an email to [homebuilder@suiteengine.com](mailto:homebuilder@suiteengine.com).

## Enhancements:

## Corrections:

1. The sales and purchase documents in the base system required HomeBuilder setup to be completed. This should not be the case and the way that Dimensions is used should be detached to a greater degree than it was.
2. Change the behaviour to that a defaulting (rather than synchronized) with Dimensions associated with the following tables:
  - a. Phase
  - b. Lot
  - c. Cost Group
  - d. Cost Detail

## Release Objects

3. See next regular release notes for which objects were modified.
