

Suite Engine Channel Payments Manager Release Notes

Product: Channel Payments Manager Core

Release: 1.1

Version: 1.1.2022061319.49014

Release Date: 06/13/2022

Minimum Business Central Version Compatibility: 19.0

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements.

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at <https://suiteengine.com/support>.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release is compatible with the Business Central version listed above as the **Minimum Business Central Version Compatibility** and all subsequent Business Central versions; if you are deploying this release in a Business Central environment that has an earlier version than this value, functionality may not work as intended.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see [here](#)) and make any adjustments to these packages as needed.

Release Overview

Features and Functionality

- A new **Default Payment Method** field has been added to the **CPM Payment Platform** table. The payment method code that is defined in this field is assigned to payment customer ledger entries that are created from the payment platform's activities.
- The AssistButton for the **Contact No.** field on the **CPM Customer Link Card** page now presents a list that is filtered to only include contacts that have been set up for the assigned value in the **Customer No.** field. Previously this list would present all contact records, regardless of the assigned customer.
- It is now possible to accept payments in currencies other than the defined local currency in Business Central.

Channel Foundations

The following Channel Payments Manager Core changes will support forthcoming features and functionality for channel-specific integrations:

- Functionality has been added to support the expansion of CPM payments to sales orders in an upcoming Stripe integration:
 - It is possible to accept credit card payments for sales orders.
 - Payments can either be captured immediately or recorded as payment authorizations that will be captured at a later time.
 - Re-authorization functionality accommodates scenarios where a partial authorization amount is captured by CPM.
 - Authorization thresholds can be established that prevent the release or shipment of a sales order unless a specified authorization amount is recorded.
 - A new **CPM Payments** FactBox containing payment authorization and capture details has been added to the sales order card and list.

Corrections

- It was possible to create a payment platform record with a blank code. This has been corrected.
- Miscellaneous field captions have been updated.

Release Objects

The following objects have been created, modified, or removed as part of this release:

Object Type	Object ID	Object Name	Action
Table	70338651	SENP Customer Link	Modified
Table	70338652	SENP Payment Request	Modified
Table	70338653	SENP Payment	Modified
Table	70338660	SENP Customer Payment Method	Modified
Table	70338660	SENP Refund	Modified
Page	70338650	SENP Payment Platform	Modified
Page	70338653	SENP Customer Links	Modified
Page	70338657	SENP Payment Request Card	Modified
Page	70338659	SENP Payments	Modified
