

Suite Engine Channel Payments Manager Release Notes

Product: Channel Payments Manager Core

Release: 1.2

Version: 1.2.2022091320.56367

Release Date: 09/14/2022

Minimum Business Central Version Compatibility: 19.0

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements.

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at <https://suiteengine.com/support>.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release is compatible with the Business Central version listed above as the **Minimum Business Central Version Compatibility** and all subsequent Business Central versions; if you are deploying this release in a Business Central environment that has an earlier version than this value, functionality may not work as intended.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see [here](#)) and make any adjustments to these packages as needed.

Release Overview

Features and Functionality

- If multiple payment platforms exist in Business Central, instructing CPM to send a Business Central customer to an external payment platform will result in a list of these payment platforms being displayed, allowing you to select the one to which you want to create a link.
- A new **Mass Create Payment Platform Links** action has been added to the customer list. If multiple customers are selected in this list, executing this new action will instruct CPM to export data for these customers to a selected external payment platform. This data will be used to create new customers in the external platform, then link them to the corresponding records in Business Central.

Channel Foundations

The following Channel Payments Manager Core changes will support forthcoming features and functionality for channel-specific integrations:

- The ability to instruct CPM to automatically create payment requests for sales invoices at the time of posting has been added to support an upcoming Stripe integration.

Corrections

- The **New** ribbon on the customer card has been removed, as it contained actions and related menu items that were already present in other ribbons.
- Attempting to manually navigate through payment request records would yield an error. This has been corrected.

Miscellaneous

- Visibility to the load demo data action was removed in a previous release of CPM Core. This has been restored.

Release Objects

The following objects have been created, modified, or removed as part of this release:

Object Type	Object ID	Object Name	Action
Page	70338657	SENP Payment Request Card	Modified

Release Extensions
