

Suite Engine Channel Sales Manager Release Notes

Product: Channel Sales Manager Core

Release: 3.4

Version: 3.4.2022120921.64562

Release Date: 12/09/2022

Minimum Business Central Version Compatibility: 19.0

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements.

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at <https://suiteengine.com/support>.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release is compatible with the Business Central version listed above as the **Minimum Business Central Version Compatibility** and all subsequent Business Central versions; if you are deploying this release in a Business Central environment that has an earlier version than this value, functionality may not work as intended.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see [here](#)) and make any adjustments to these packages as needed.

Release Overview

Channel Foundations

The following Channel Sales Manager Core changes will support forthcoming features and functionality for channel-specific integrations:

- To support an upcoming BigCommerce integration, a new integration event to allow a subscriber to override the entire procedure or to add extra parameters has been added to the GetOrderLinesForOrderFromChannel procedure in the Order Mgt. Automation codeunit.
- To support an upcoming Shopify integration, a change has been made to the CreateCreditMemo codeunit to accommodate changes in the field used to map a channel's shipping method.

Corrections

- A number of fields were missing from various CSM order archive tables. This has been corrected.
- Incorrect/confusing text on the CSM category wizard has been removed.

Release Objects

The following objects have been created, modified, or removed as part of this release:

Object Type	Object ID	Object Name	Action
