

Suite Engine Channel Sales Manager Release Notes

Product: Channel Sales Manager for Magento

Release: 3.1

Version: 3.1.2022122021.65601

Release Date: 12/20/2022

Minimum Business Central Version Compatibility: 19.0

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements separate.

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at <https://suiteengine.com/support>.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release is compatible with the Business Central version listed above as the **Minimum Business Central Version Compatibility** and all subsequent Business Central versions; if you are deploying this release in a Business Central environment that has an earlier version than this value, functionality may not work as intended.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see [here](#)) and make any adjustments to these packages as needed.

Release Overview

- Support for Microsoft Dynamics 365 Business Central 2022 Wave 2 (version 21) has been added to CSM for Magento.
- Functionality has been added to CSM for Magento to support payments made with gift cards, including split payment scenarios where a portion of the order total is paid with a gift card and the remainder is handled via another payment method.
- An automation routine for the automatic sending of CSM listings to a connected Magento channel has been added to CSM for Magento.

Corrections

- When multiple CSM channel extensions were installed in a Business Central environment, a duplicate **Load Products from Channel** action was being presented on all non-Magento sales channels. This has been corrected.

- The **API Scope** field on the sales channel did not support lowercase store codes. This has been corrected.
- The mapping for the STORESALESORDERLIST function was incorrect. This has been corrected.
- It was not possible to complete a shipment for orders that included configurable items. This has been corrected.
