

Suite Engine Channel Payments Manager Release Notes

Product: Channel Payments Manager Core

Release: 1.5

Version: 1.5.2023062822.88619

Release Date: 06/29/2023

Minimum Business Central Version Compatibility: 20.0

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements.

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at <https://suiteengine.com/support>.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release is compatible with the Business Central version listed above as the **Minimum Business Central Version Compatibility** and all subsequent Business Central versions; if you are deploying this release in a Business Central environment that has an earlier version than this value, functionality may not work as intended.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see [here](#)) and make any adjustments to these packages as needed.

Release Overview

Features and Functionality

- The following improvements have been made to the **CPM Transaction Worksheet** page:
 - It is now possible to record comments against a worksheet line prior to posting.
 - A new **Set Posting Not Required** action has been added to the **CPM Transaction Worksheet** page. This will allow a user to manually remove lines from the worksheet without posting.

Corrections

- In a situation where a payment that was captured for a sales order ultimately fails (such as an ACH payment that is initially captured but then fails later on due to insufficient funds), the failed amount was not being reversed from the order's captured amount. This has been corrected.

Release Objects

The following objects have been created, modified, or removed as part of this release:

Object Type	Object ID	Object Name	Action
Table	70338654	SENP Transaction	Modified
Table	70338663	SENP Comment Line	Created
Page	70338661	SENP Transactions	Modified
