

Suite Engine Channel Payments Manager Release Notes

Product: Channel Payments Manager for Stripe

Release: 1.9

Version: 1.9.2024071823.145933

Release Date: 07/19/2024

Minimum Business Central Version Compatibility: 23.5

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements.

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at <https://suiteengine.com/support>.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release is compatible with the Business Central version listed above as the **Minimum Business Central Version Compatibility** and all subsequent Business Central versions; if you are deploying this release in a Business Central environment that has an earlier version than this value, functionality may not work as intended.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see [here](#)) and make any adjustments to these packages as needed.

Release Overview

- In a scenario where the initial payment capture attempt against a payment request failed and then a subsequent attempt succeeded, it was possible for CPM to retrieve the transaction into Business Central but not apply it to the proper entry in the customer ledger. This has been corrected.
- In scenarios involving the CSM-CPM Connector, it is possible for CSM to retrieve an eCommerce order into Business Central, including the related CPM payment for that order, prior to CPM retrieving the related payment request. In such an instance, the payment request would not be properly linked to the appropriate sales order. This has been corrected.

Release Objects

The following objects have been created, modified, or removed as part of this release:

Object Type	Object ID	Object Name	Action
Codeunit	70338728	SENP Stripe Response Mgt	Modified
