Suite Engine Channel Sales Manager Release Notes

Product: Channel Sales Manager for Amazon
Release: 3.4
Version: 3.4.2024051424.135894
Release Date: 05/16/2024
Minimum Business Central Version Compatibility: 22.0

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements.

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at https://suiteengine.com/support.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see here) and make any adjustments to these packages as needed.

Release Overview

Corrections
- The **Get Specific Channel Order** action on the **CSM Sales Channel** page was not visible due to changes made to other channel extensions. This has been corrected.
- Attempting to send an FBA inbound shipment's transport content for LTL partnered shipments would result in an error. This has been corrected.

Miscellaneous
- CSM for Amazon has been compiled against Microsoft Dynamics 365 Business Central 2024 Wave 1 (version 24) for compatibility issues. No issues were detected and no immediate changes to the

extension were necessary. A number of clean-up activities were performed to accommodate changes or upcoming deprecations that were introduced with this release.

- Automated tests have been added for automatic lot number assignment functionality that was introduced in a previous version of CSM for Amazon.

Release Objects

The following objects have been created, modified, or deprecated as part of this release:

Object Type	Object ID	Object Name	Action
