Suite Engine Channel Sales Manager Release Notes

Product: Channel Sales Manager for Shopify
Release: 4.10
Version: 4.10.2024112625.165228
Release Date: 12/04/2024
Minimum Business Central Version Compatibility: 24.0

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements.

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at https://suiteengine.com/support.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see here) and make any adjustments to these packages as needed.

Release Overview

Corrections

- It was not possible to open a Shopify sales channel if it did not have an assigned CSM API set code. This has been corrected in preparation for a future release in which *CSM for Shopify* will be refactored to use CSM's modern API engine, at which point it will not be necessary to assign a CSM API set code to sales channels.
- A number of issues regarding the retrieval of creation of CSM listings via the **Load Products from Channel** action have been corrected:
    - CSM listings for parent items were being assigned a product type of *Simple*. This has been corrected to assign a product type of *Configurable*.

- o CSM was failing to assign a Business Central item (when one already existed) to CSM listings for parent items.
- o On the **CSM Listing Children List** FastTab for the parent item's listing, CSM was not assigning an external SKU ID to configurable children.
- o On the **CSM Listing Children List** FastTab for the parent item's listing, CSM was assigning an incorrect value as the external ID for configurable children.

Miscellaneous

- *CSM for Shopify* added a *Variant* option to CSM listing product types. This option was identified as redundant; the existing *Variation* option should be used instead. This *Variant* option has been marked as pending obsolete and will be removed in a future release of *CSM for Shopify*.

Release Objects

The following objects have been created, modified, or deprecated as part of this release:

Object Type	Object ID	Object Name	Action
Codeunit	83002	CSM Shopify Test Library	Modified
Codeunit	83003	CSM Shopify Listing Mgt Test	Modified
Codeunit	70338375	CSM Shopify Utility Functions	Modified
Codeunit	70338376	CSM API Shopify Processing	Modified
Codeunit	70338378	CSM Stripe Integration Shopify	Modified
