

Suite Engine Channel Sales Manager Release Notes

Product: Channel Sales Manager for Shopify

Release: 4.8

Version: 4.8.2024080223.148142

Release Date: 08/04/2024

Minimum Business Central Version Compatibility: 23.0

Please install this release in your Business Central sandbox environment for testing. It is Suite Engine's recommendation that you test not only the areas specifically addressed within this release but all of your business processes, so that you may confirm that changes introduced in this release have not created issues in other parts of your application. These release notes should be fully reviewed as part of your testing process, as they may include information on new setup and configuration requirements.

If you encounter issues in your testing, please contact your Suite Engine partner or file a support ticket at <https://suiteengine.com/support>.

Once you have completed testing in your sandbox, you can proceed to installing this release in your live environment. Suite Engine recommends that users be logged out of Business Central prior to installation of the release; if this is not possible, please advise your users that it may be necessary to refresh or log out/log in to Business Central in order to continue working with the application.

This release is issued under the assumption that you have kept your existing Suite Engine applications current. Suite Engine cannot be held responsible for any issues that arise out of installing this release into an out-of-date environment.

This release may introduce new table objects or modifications to existing ones. If you are maintaining configuration packages for the purpose of moving data to and from database environments, you are advised to take note of any table changes (for a complete list of release objects, see [here](#)) and make any adjustments to these packages as needed.

Release Overview

Features and Functionality

- Notes that have been entered against a Shopify order are now included as part of CSM's order retrieval process and are added as CSM order documents on the related CSM order.
- Shopify-specific accommodations have been made to support CSM Core functionality that instructs CSM to consolidate all sales taxes onto a single sales order line.

Corrections

- Discounts were not being properly applied to order lines that were configured to include tax as part of the sales price. This has been corrected.

- Failed/declined order payments were still being posted to the customer ledger. This has been corrected.
- The **Default Product Status** field on the **CSM Sales Channel** card was displaying all available status options, including non-Shopify choices. This has been corrected.

Miscellaneous

- *CSM for Shopify* has been compiled against Microsoft Dynamics 365 Business Central 2024 Wave 1 (version 24) for compatibility issues. No issues were detected and no immediate changes to the extension were necessary. A number of clean-up activities were performed to accommodate changes or upcoming deprecations that were introduced with this release.

Release Objects

The following objects have been created, modified, or deprecated as part of this release:

Object Type	Object ID	Object Name	Action
Page	70338376	CSM Shopify Setup Wizard	Modified
